

## **"Do this first" list for Ubuntu (actions to do right after installation)**

**Tip:** print this list on paper, so that you can strike what you've done.

Source: <http://sites.google.com/site/easylinuxtipsproject>

### **1 TEN ESSENTIAL ACTIONS:**

- 1.1 Apply all available updates
- 1.2 Make sure all hardware is working properly and install missing drivers
- 1.3 Optimize your Solid State Drive (SSD)
- 1.4 Install some useful tools
- 1.5 Decrease the swap use (very important!)
- 1.6 Solve some known bugs
- 1.7 Install full multimedia support
- 1.8 Avoid 10 fatal mistakes!
- 1.9 Turn on the firewall
- 1.10 Install Xfburn for burning DVD's

### **2 TEN RECOMMENDED ACTIONS (NOT ESSENTIAL):**

- 2.1 Install gnome-session-flashback and consider disabling the visual effects
- 2.2 Optimize Firefox
- 2.3 Install Chrome or Chromium as second browser and improve it
- 2.4 Improve the configuration of Libre Office
- 2.5 Disable advertisements in the Dash and normalize the appearance
- 2.6 Make NumLock turn on automatically
- 2.7 Have a laptop? Tame your touchpad
- 2.8 Speed up your Ubuntu
- 2.9 Enable the key combination Ctrl+Alt+Backspace
- 2.10 Migrate your e-mail from Outlook (Express) in Windows, to Ubuntu
